

# Organisation de Test Link:

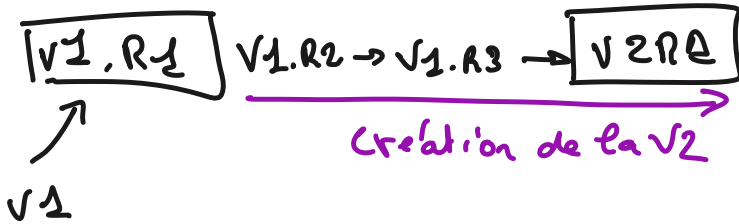

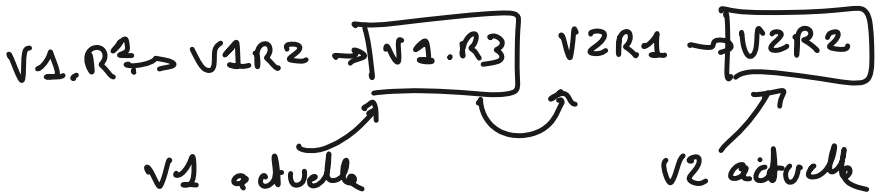

# Gestion des Versions

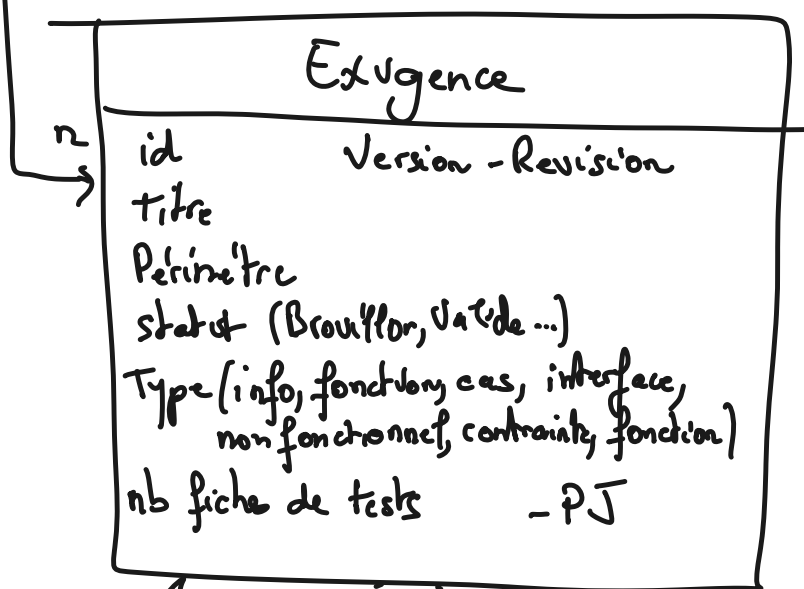

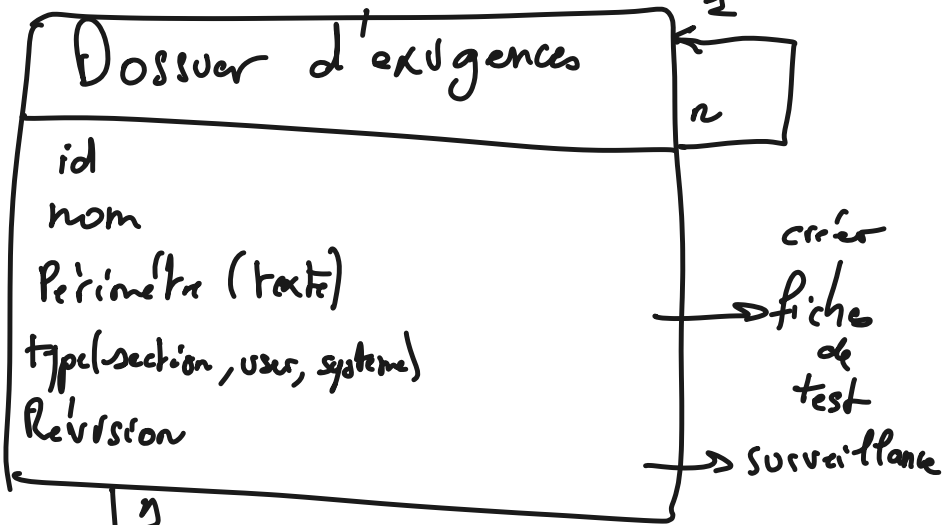

choix scénario 1:

- chaque version R1 est définitive,  
Propre à son majeur

- chaque dernière Revision = dernière version majeure

Fiche de tests

relation fautive

Exercice : Réaliser une structure d'exigences  
Pour définir les tests pour une application  
de calculs en ligne basée sur :

<http://testlink2018.azurewebsites.net/>

Etapes :

Créer son dossier d'exigences

Créer des sous dossiers d'exigences, et  
exigences

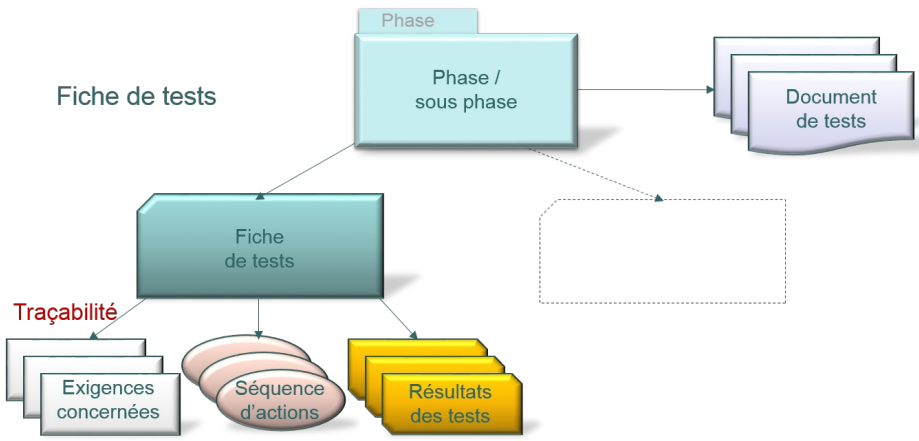

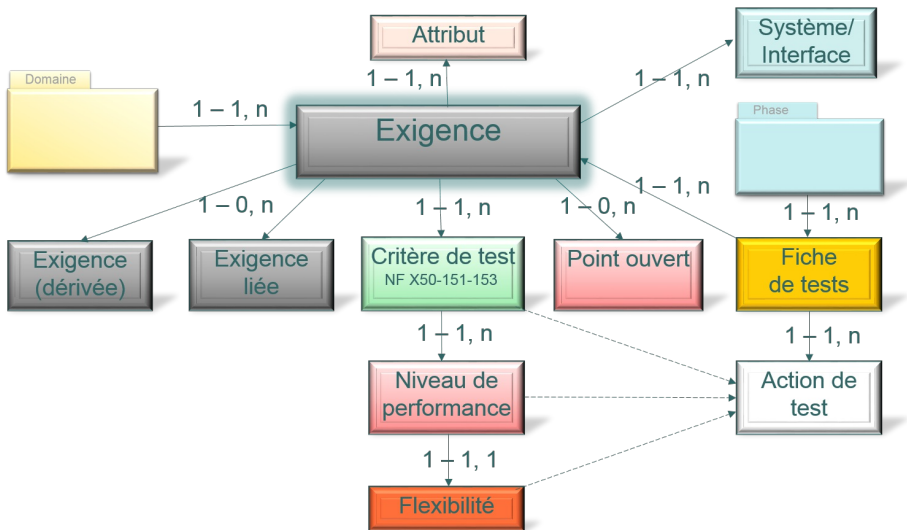

Travailler les versions, le contenu

Exporter au format XML

Modifier avec un editeur de texte

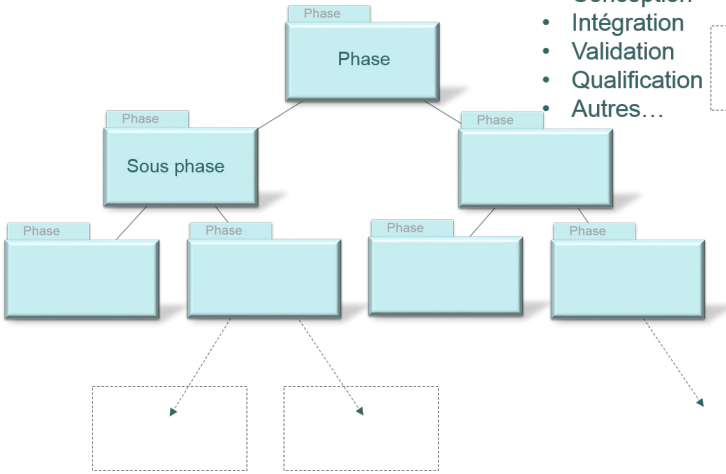

Reimporter avec nouvelle version dans TL

Vérifier

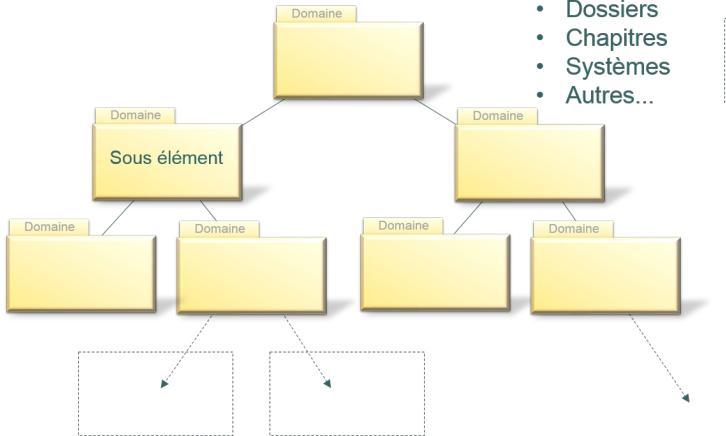

Phases :

- Conception
- Intégration
- Validation
- Qualification
- Autres...

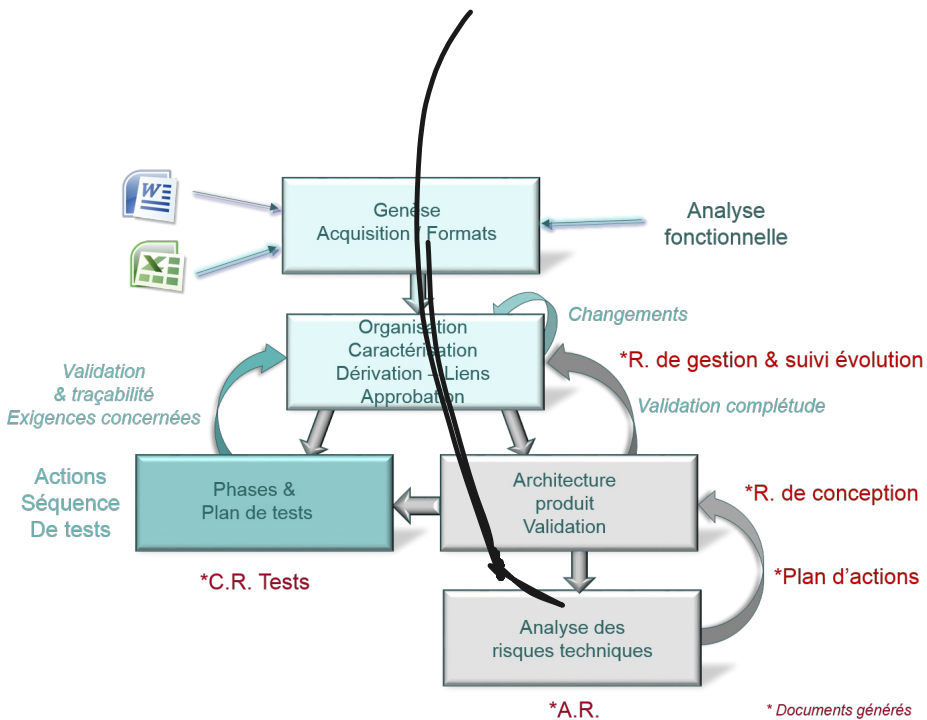

En :

- Domaines
- Dossiers
- Chapitres
- Systèmes
- Autres...

## Etapes d'une Campagne de Tests:

## Créer ses fiches de Tests:

Bureau → Gestion des fiches

Nolette → créer de / dossier  
/ fiches

Créer une fiche et ajouter les étapes

Reorganiser:

1.) Reséquencer les étapes

2.) Cliquer sur 

3.) Renseigner les nouvelles positions

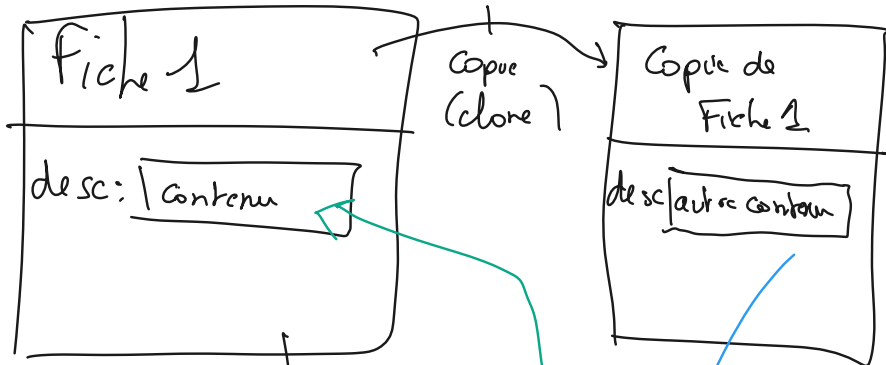

4.) Clic sur "Reorganiser les étapes"

Produit

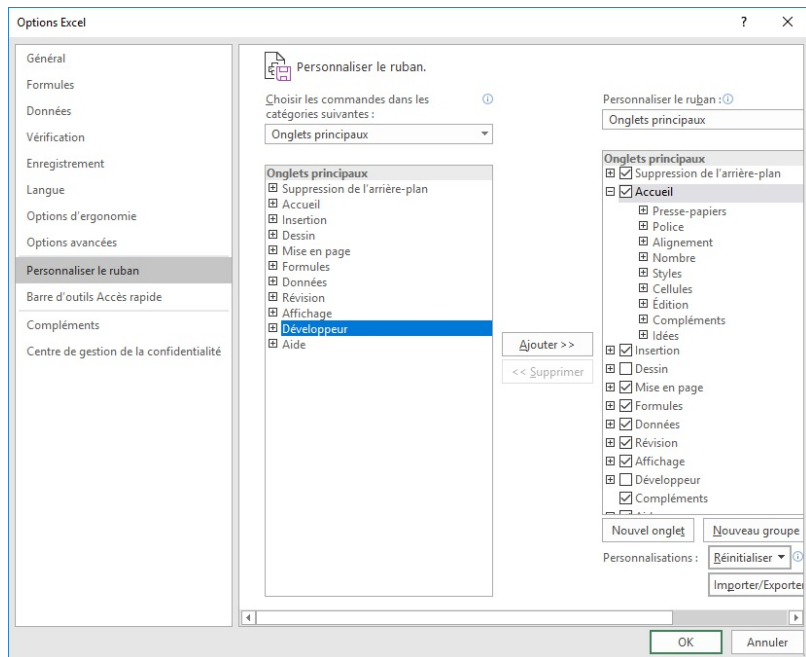

Campagne

Ajout de  
fiche de test

## Mise en pratique de la création de campagnes :

- 1) Créer une campagne
- 2) y définir les produits et Jalons
- 3) y ajouter des cas de tests
- 4) Prioriser les tests
- 5) faire évoluer une fiche de test

# Liste des roles :

## Test Plan

- Test Plan create/edit
