Index columnstore :

```
select id, avg(montant) from lineitem group by id
```

```
-- 14 secondes
```

```
-- bonne requete = 0s
```

```
select avg(montant) from lineitem
```

```
-- 19 secondes
```

```
-- 0s
```

```
select count(*) from lineitem
```

```
-- 24 millions
```

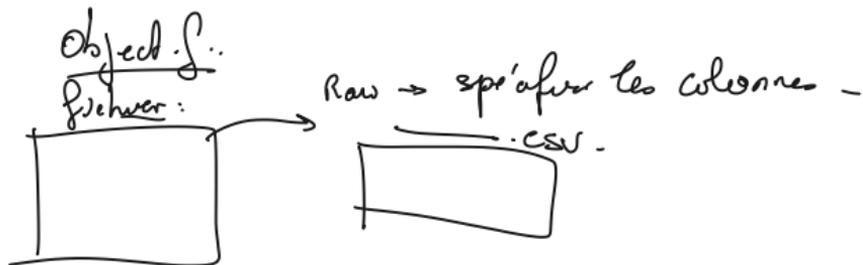

```
insert into lineitem select * from lineitem
```

```
create columnstore index ix_lineitem on lineitem(id,montant)
```

```
drop index ix_lineitem on lineitem
```

Scénario SSIS :

importer une série de fichiers
(de structure identique).
